BACON

Bo Mikkelsen, Kristian Bundgaard, Denmark, 1999

3 min. | DK/Experimental

The aim of the films is to draw the analogue and the happenstance into computer animation in a way that what is perfect and controlled is pushed into the background. The scanner has been utilized precisely because its manner of forming pictures takes place as a function of time and movement. This provides the possibility for manipulating each and every picture in an analogue way in the process of scanning. The film has been created with scanning only.

Basic information

Credits
