Film

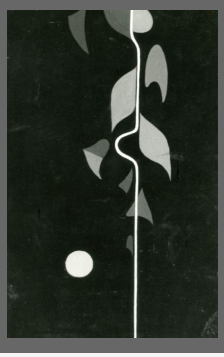

THE SUN IS RED

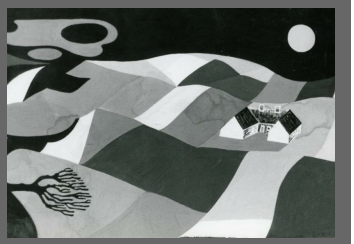

Bent Barfod, Denmark, 1972
13 min. | DK/Experimental | Animation

A film about the pollution of our environment which asks: "... is it enough for me to realize the approaching danger to ur mileu? Is it only an illusion, a self created enemy? ... whose appearance we may only dimly visualize, but nevertheless represents a force that can strike back emmediately?" This ends on the note: "It is later than you think".
