BLACK BOX

Søren Martinsen, Lars Mathisen, Anna Bridgwater, Denmark, 1993
 DK/Documentary

Black Box is a concept used in cybernetics and computer science. It describes a closed system, the contents of which are unknown and which can only be calculated by observing in- and output. The video depicts the concept artistically and visually with installations by 27 young artists participating in the exhibition Black Box, arranged by the Art and Culture group Globe, 1993.
