

MIRRORS OF THE PLANET

EN | DA

Jytte Rex, Denmark, 1992
90 min. | DK/Feature

Jytte Rex' sixth feature explores the here and now, the once and future beyond, Death and Eros, and proof of God's existence to be found in the Black Holes in a universe of nothingness. Tangible human individuals like Adam, an astronome, and two small children move through the surreal landscapes of Jytte Rex' cinematic poetry. If a door opens, it is only to lead you into Eternity's ultimate maze.
