

DANNY'S DOOMSDAY

EN | DA

Martin Barnewitz, Denmark, 2014

90 min. | DK/Feature | Adventure

Due to climate change, a new race of flesh eating predators arise who invade and eat everything living on earth. In a residential neighborhood in a Danish suburb, nightmare-like scenes are being experienced first-hand through the eyes of two teenage brothers, who cannot stand each other, but are now suddenly forced to barricade themselves in the basement together to avoid being eaten. From one day to another, without parents and without electricity, food, water and contact to other people, the brothers have to learn to live together in their vital protection bunker, while monsters move past the basement windows and heavy sharp claws can be heard moving around upstairs on the wooden floors.
