L'inspiration, l'impression et l'expansion

VAF 2018 and TAW Talks is proud to present a strong line up of excellent and skilled French masters in animation and graphic storytelling.

We hope to inspire, impress and expand You!

"The art of animation in France is born from an approach that deepens a set of rules staging views of the mind and their credibility, through the making of a film. It is a universe inhabited by excellent fellows who learn drawing, perspective, the mazes of stories and programs, who apply concretely the physics of movement, to suddenly lead to a sort of prodigious mastery . But then, only then, does the magic happen... when there are those who venture to disconcerting audacities that connect their hand to the movements of ideas."

"L'art de l'Animation en France est né d'une démarche qui approfondit un ensemble de règles mettant en scène des vues de l'esprit et leur crédibilité, à travers la fabrication d'un film. Il s'agit d'un univers habité par de très bons élèves qui apprennent le dessin, la perspective, les dédales des récits et des programmes, qui s'appliquent concrètement sur la physique du mouvement, pour aboutir soudainement à une sorte de maîtrise prodigieuse. Mais c'est alors, rien qu'alors, que la magie se produit...quand il y en a qui s'aventurent vers des audaces déconcertantes qui connectent leur main aux mouvements des idées.
